PROFESSIONAL SUMMARY

B.Tech Computer Science (AI/ML/DL) student (9.88 SGPA) with hands-on experience building production-grade AI systems, including RAG-based knowledge assistants and AI-powered healthcare triage platforms. Skilled in full-stack development (React, Node.js, Python) and AI/ML integration using LangChain, vector databases, and cloud data platforms. Top-3 hackathon finisher with a track record of shipping solutions that improve efficiency by 20-40%.

EDUCATION

B.Tech, Computer Science (AI, ML, DL) — Teerthanker Mahaveer University, Moradabad *Jul 2024 – Present*

- SGPA: 9.29 (Sem 1), 9.88 (Sem 2), 9.55 (Sem 3), 9.33 (Sem 4) | Coursework: Data Structures, Machine Learning, Deep Learning, NLP, Web Development, DBMS
- IEEE Student Member; Class Representative (2 semesters); Top 3 of 50+ entries, Internal Hackathon

Higher Secondary (ISC-XII) — Wilsonia College, Moradabad *May 2022 – Jul 2024*

- Score: 91% (Physics, Chemistry, Mathematics, Computer Science); completed a 3-year Java programming curriculum

INTERNSHIP EXPERIENCE

Business Intelligence Intern — Microsoft Elevate (AICTE), Remote *Feb 2026 – Mar 2026*

- Built a Sales Performance dashboard and a state-wise Maternal Health Analytics dashboard (MMR, anemia prevalence, SDG 2030 progress) in Power BI using filled maps, Top-N combo charts, and gauge visuals
- Achieved a 9/10 evaluator score for dashboard design, visual balance, and analytical depth

Deep Learning Intern — Uptoskills, Remote (Delhi) *Jul 2025 – Present*

- Engineered a real-time, multi-model CV pipeline across 9 processing stages for CCTV anomaly and chain-snatching detection sustaining sub-200ms per-frame GPU latency, cutting false positives 85% via 6-signal weighted decision-fusion engine.
- Built a geometric behavioral pre-filter that eliminated 99% of non-suspicious footage before invoking deep models, trained a 256 component GMM hitting 99.8% accuracy on UCF101/HMDB51 benchmarks.

Web Development Assistant (Project-Based) — Anant Webtics, Moradabad *Mar 2025 – May 2025*

- Co-built a Library Management web app with seat booking and admin controls, improving booking efficiency by 25%
- Integrated responsive frontend components using Git and Agile sprints, cutting design-to-deploy time by 20% with 100% on-time delivery

PROJECTS

CardioAssist — AI-Powered Emergency Triage Platform *React, Node.js, Python, Snowflake*

- Built an end-to-end triage system classifying patient risk (Low/Medium/High) in under 10 seconds, cutting average decision time from 15 to under 10 minutes
- Built a data-validation pipeline that standardized messy clinical inputs, improving model accuracy by 15%; added RBAC and PII masking for HIPAA-aligned security

NeuroGrid — RAG-Based AI Knowledge Assistant *Python, LangChain, Pinecone/Chroma, OpenAI API*

- Built a Retrieval-Augmented Generation pipeline (chunking → embeddings → vector search → LLM generation) for grounded, citation-backed document Q&A
- Indexed 500+ document chunks with sub-second retrieval latency, improving response accuracy by 40% over vanilla LLM queries

Elegance — AR-Powered E-Commerce Platform *React, Node.js, MongoDB, TensorFlow.js, AR.js*

- Built an AR try-on experience with AR.js and a collaborative-filtering recommendation engine, lifting user engagement time by 25%
- Reduced simulated product return rates by 20% via real-time 3D product previews over a 200+ item MongoDB catalog

---

TECHNICAL SKILLS

- Languages: Python, JavaScript, Java, SQL
- AI/ML: RAG, LangChain, Vector Databases (Pinecone, Chroma), TensorFlow, Scikit-learn, NLP

- Web & Backend: React.js, Next.js, Node.js, Express.js, REST APIs, HTML/CSS
- Databases & Cloud: MongoDB, MySQL, PostgreSQL, Snowflake, Firebase, Vercel, Netlify, Docker (basic)

- Data & BI: Power BI, DAX, Data Visualization, ETL Pipelines | Tools: Git/GitHub, Postman, Figma

---

CERTIFICATIONS & ACHIEVEMENTS

- AWS Academy Graduate - Generative AI Foundations (Feb 2026)
- MongoDB - RAG, Advanced Schema Patterns and Anti-patterns
- Oracle Cloud Infrastructure 2025 Generative AI Professional
- Microsoft Elevate – AICTE Power BI Internship Certification (Feb 2026)
- Best Project Award, TMU Internal Hackathon — Blood Donation Platform with Google Maps API, Top 3 of 50+ entries (Feb 2025)
- IoT Workshop: ESP-based proximity alert system built with ultrasonic sensors and Arduino IDE (Oct 2024)
